**NO LINES. NO LABOR. NO LOSS.**

## One-Time™ is the standard in digital media security packaging.

**With an innovative internal lock that answers libraries need for theft deterrence, the One-Time™ secures and protects media while eliminating the logistical bottlenecks and related costs of an external removable lock.**

The entire case is sealed and reinforced with double-overlapping walls to enhance security and provide maximum protection against the harsh environment of a library drop box. A red-green color coding system clearly indicates when a case is open or locked by a simple swipe through the decoupler key, which conveniently mounts to the check-out counter.

- Available in configurations up to 6 discs in a standard Amaray footprint, 3 discs in Blu-ray footprint, and up to 3 discs in a CD case footprint
- Unique internal lock enables the industry's fastest checkout solution and eliminates a separate inventory item while maximizing shelf density
- Features reinforced case design with double overlapping walls to prevent tampering and theft
- Entire case is sealed, protects EAS and RFID tags
- UMD-11 Decoupler unlocks all variants of One-Time security cases and incorporates a "night lock" to reduce opportunities for internal theft
